

# Addressable TV

Target new customers through addressable TV campaigns

## Objective

- Verify that TV ads were having an incremental impact on new customer acquisition efforts
- Target individuals on household level and accurately measure their cost per incremental sale (CPIS)

## Strategy

- Utilize multi-sourced national consumer database to identify the top tier prospects in the US, and match those prospects to cable and satellite provider's files
- Measure impact through ads in households with top tier prospects versus a control group

## Results

18%

More Likely to Quote

43%

CPIS Lower than Allowable

20%

More Likely to Become  
a Customer
